CSS Assignment 02

🎯 Auth Pages Design

📝 Instructions:

Create login, register, and forget password pages using only HTML & CSS, **following the design provided in the reference images.**

📌 login.html file

📌 register.html file

📌 forget-password.html file

- Build the HTML structure for the pages.

- Link the `style.css` file inside the `<head>` section of your HTML documents.

- Each button in the files should function as a link to navigate to a different page.

- Use the **"Archivo"** font family.

  - Font link: <u>Archivo - Google Fonts</u>

📌 style.css file

- Write all CSS styles in this file.

- Ensure the file is properly linked to all pages.

- Do not use inline or internal CSS – only external CSS in this file is allowed.

- Use **rem** for font size.

- Use class selectors.

- Colors:

  - Black: #000000
  - White: #efefef
  - Gray Background: #1a1a1a
  - Gray Text: #828282

✅ Submission:

- Submit three pages `login.html, register.html, forget-password.html` and `style.css` files in a **single folder**.
- Name the folder with **your university ID number**.
- Compress the folder into a **.zip file** before submission.
- **Do not use AI** 😑
